**PETITION FOR CHANGE**  
**APPLICATION 30384**

***1. Description of Proposed Changes or Work Remaining To Be Completed***

Original Project

Application 30384 was filed July 21, 1994 and amended July 30, 2003. The amended application was noticed November 18, 2005. As noticed, the applicant proposes to divert and store 245 acre-feet per annum of water from December 15 through April 15 of the succeeding year. Five reservoirs would store the collected water. An existing 35 acre-foot (af) capacity onstream reservoir built under Licensed Application 20370 would be enlarged to 49 af. The point of diversion (POD) would be from an unnamed stream tributary to Pope Creek thence Putah Creek thence the Yolo Bypass. Four offstream pit reservoirs, each with a capacity of 49 af would also be constructed. Diversion to the four offstream reservoirs would take place from a moveable POD along Pope Creek.

Proposed Project

Pursuant to the Petitions for Change and Redistribution of Storage, the applicant proposes to increase the capacity of the existing onstream reservoir from 35 acre-feet to 196 acre-feet. The enlarged reservoir will include the capacity Licensed pursuant to Application 20370. Diversion to onstream storage in the enlarged reservoir will be from an unnamed stream tributary to Pope Creek at the point referred to herein as POD 1 and from Pope Creek at the point referred to herein as POD No. 2 (see attached map). The moveable POD along Pope Creek will be abandoned in favor of a stationary pump located at POD No. 2. Proposed offstream pit reservoir Nos. 1, 2 and 3 will be abandoned; Reservoir No. 4 will be constructed with a capacity of 49 af. Water will be diverted to offstream storage in Reservoir No. 4 from POD Nos. 1 and 2.

No other changes are being requested as a result of these Petitions.
